Key to *Pectiniidae* Genera

Colonies more conspicuous than coenestial structures

Non-colonial = **Genus *Echinomorpha*** (not in our region)

-Colonial

Coenostial pits present = **Genus *Oxypora***

Coenostial pits absent

Corallites not inclined = **Genus *Echinophyllia***

Corallites inclined = **Genus *Mycedium***

Key to *Oxypora* species

Lamina with conspicuous costal ridges = ***O. crassispinosa***

Laminae without conspicuous costal ridges

-Corallites indistinct = ***O. convoluta****

-Corallites distinct

--Costal spines abundant = ***O. lacera***

--Costal spines uncommon or absent.

---Corallite exsert = ***O. egyptensis* ***

* Species described from Sinai Peninsula, Egypt
