Key to *Pocilloporidae* Genera

Colonies have verrucae = **Genus *Pocillopora***

Colonies do not have verrucae

Branches fine = **Genus *Seriatopora***

Branches robust = **Genus *Stylophora***

Key to *Seriatopora* species

Branches 2-5 mm diameter

Branches taper to a point = ***S. hystrix***

Branches > 5 mm diameter

Corallites aligned in rows

Branches long and not tapered = ***S. caliendrum***

-Colony with elongate branches

--Verrucae not longer than wide

---Branches not laterally fused = ***P. eydouxi*** *

S. spinosa and ***S. angulata*** not in Veron's (2000) list

S. angulata = ***S. hystrix*** (World Register of Marine species = WoRMS)

* Recorded from Red Sea (Veron, 2000) - may occur in the future. Samples from Seychelles in IUI collection)
